Career Objective

Technology professional transitioning into AI & Data Science with experience in cloud platforms and large-scale application environments. Interested in developing intelligent, data-driven systems that combine analytical thinking with practical engineering execution.

Work Experience

Professional Experience | 2011 – 2024

Experience across enterprise cloud environments, application deployment, and system reliability functions.

- Managed AWS infrastructure (EC2, IAM, VPC, CloudWatch) for production systems.
- Designed and maintained CI/CD pipelines for consistent application releases.
- Implemented infrastructure provisioning and environment configuration across SDLC stages.
- Developed scripts to optimize operational workflows.
- Supported containerized deployments and scalable cloud architectures.
- Improved monitoring, logging, and incident resolution processes.

Organizations: JP Morgan Chase & Co (2023–2024) | I Weave (2016–2023) | JK Technologies (2011–2016)

Internship Experience

Dec 2025 - Jan 2026

Recruitment Internship – Havoc Consultants:

March 2026 – Present | Ahmedabad, Gujarat

- Supporting end-to-end recruitment activities including candidate sourcing, screening, and interview coordination.
- Sourcing candidates through Naukri, LinkedIn, and internal databases using Boolean search techniques.
- Screening resumes and evaluating candidates against client requirements across IT, Engineering, BFSI, and corporate functions.
- Coordinating interviews, candidate follow-ups, and stakeholder communications.
- Maintaining recruitment trackers, candidate pipelines, and hiring reports.
- Developed a recruitment analytics dashboard using Python and Excel by consolidating recruiter activity data and generating actionable insights.
- Assisted in preparing hiring metrics, sourcing reports, and recruitment presentations for management review.

Academic Projects

Real Estate Value Predictor - Agentic AI System:

Dec 2025 - Jan 2026

- Designed a multi-agent AI architecture (Asset Detection, Retrieval, Valuation, Decision, Visualization) using Python and Lang Chain for real estate buy and rent valuation.

- Integrated Retrieval Augmented Generation (CSV comparables + live web signals) with regression-based price estimation to generate grounded, market-aligned predictions.
- Deployed the system on Hugging Face Spaces using Groq Llama 3.3 (70B) with deterministic visualization logic and structured output formatting.

Parking Occupancy Detection System:

Dec 2025 - Jan 2026

- Designed a real-time image processing system using Python and OpenCV to monitor parking occupancy.
- Implemented computer vision algorithms to detect vacant and occupied slots from live video feeds.
- Generated utilization insights to support smart city planning and traffic optimization.

Secure Cloud Networking (AWS):

Nov 2025 - Dec 2025

- AWS VPC, EC2, NAT Gateway.
- Designed a production-grade VPC architecture enforcing strict network isolation through public and private subnet segregation.
- Configured high-availability NAT Gateways to facilitate secure outbound patch updates for private instances without exposing them to public ingress.
- Hardened the security posture by implementing least-privilege routing tables and security group rules.

Hotel Ratings & Tariff Analysis:

Dec 2025 - Jan 2026

- Used Python (Pandas, Scikit-Learn) to analyse hotel data and understand how amenities, location, and ratings affect pricing.
- Built machine learning models to predict hotel tariffs and identify undervalued properties.
- Generated clear, data-driven insights to help improve pricing strategy and revenue decisions.

Additional Project:

Fashion Recommendation System (In Progress)

- Developing a context-aware outfit recommendation app that suggests clothing based on weather data, user mood, occasion, and personal wardrobe inventory.
- Implementing rule-based filtering and scoring logic to generate personalized daily outfit combinations.

Skills

Cloud	Programming	AI	Soft skills
EC2	SQL	LLM	Communication
VPC	Python	Lang Chain	Problem-solving
S3		Agentic AI	Teamwork
CloudFormation		Hugging Face	

Certifications

- Python 101 for Data Science By IBM
- SQL and Relational Databases 101 By IBM
- AWS Certified DevOps Engineer – Professional

Achievement

- Secured Second Runner-Up position at Ideathon.
- Ranked among the Top 10 teams at the Impackathon event.

Education

Adani Institute of Digital Technology Management

2025 - Present

PGDM in AI & DS

GPA: 2.81/4.33

Lingaya’s Vidyapeeth

2007 - 2011

B. Tech IT

CGPA: 8.4/10.00

Class XII – MGHS School

Percentage 66.5 %

Class X – MGHS School

Percentage 83 %

Personal Details

Date Of Birth: 10-03-1990

Languages Known: English, Tamil, Hindi

Hobbies: Reading non-fiction and Tech blogs, Fitness and Endurance Training, Exploring emerging AI tools
