📍 Gandhidham, Kutch, Gujarat,
India 370201

SKILLS :

- Static & Dynamic Web Design
- Network Monitoring (Basics)
- Intrusion Detection Systems (IDS)
- Machine Learning
- UI/UX
- Canva
- Android Development (Basic)

EDUCATION :

2021-2024

GOVERNMENT POLYTECHNIC ,BHUUJ
Diploma in Computer Engineering

2024 – 2027

ITM (SLS) BARODA UNIVERSITY
B.Tech CSE (Cyber Security & Networking)
Student

CERTIFICATIONS :

- Ethical Hacking and Cybersecurity – Udemy (2026)
- Designathon Participation Certificate – ITM University, Vadodara (2026)

SUMMARY :

B.Tech Cyber Security & Networking student with a strong interest in network security, intrusion detection systems (IDS), and vulnerability analysis. Skilled in Python, Java, Machine Learning, OpenCV, and Firebase, with experience developing AI-based emotion recognition systems and Android applications. Seeking an internship to apply cybersecurity and machine learning skills in real-world environments.

PROJECTS :

INTRUSION DETECTION SYSTEM (IDS) USING MACHINE LEARNING

Tech Stack: Python, Scapy, Scikit-learn, Tkinter, Pandas, Matplotlib

Roles & Responsibilities:

- Developed a real-time Intrusion Detection System to monitor and analyze network traffic
- Implemented Machine Learning (Random Forest) to detect cyber attacks such as DoS
- Designed rule-based detection to identify port scanning activities
- Built an interactive GUI dashboard using Tkinter for logs, alerts, and traffic visualization
- Implemented automatic IP blocking for suspicious activities
- Integrated geo-location tracking to identify attacker IP locations

SHAYOG - DONATION APP

Tech Stack: Java, Android Studio, Firebase, Firestore

Roles & Responsibilities:

- Developed an Android donation platform enabling users to donate food and money efficiently.
- Implemented secure user authentication (login/signup) using Firebase services.
- Integrated Firebase Firestore for real-time storage and retrieval of donation data.
- Designed an interactive RecyclerView-based UI to display donation history dynamically.
