EDUCATION

Diploma in Computer science

**M.S. Gosavi polytechnic
institute Nashik**

2020-2023

B.Tech Computer Science

Engineering student

ITM (SLS) BARODA UNIVERSITY

2024-2027

CERTIFICATIONS

- Full Stack Web Development using ASP.NET (.NET)
- Designathon Participation Certificate – ITM University, Vadodara (2026)
- Python Programming-Homeflic Wegrow (Dec 2021)

SKILLS

- Full Stack Development (ASP.NET)
- HTML, CSS, JAVASCRIPT, React
- Python
- UI/UX Design (Figma)
- Graphic Designing (Basic)
- Canva
- Android Development (Basic)
- Flutter (Basic)

PROFILE

Computer Science Engineering student with knowledge of ASP.NET full-stack development, Android application development, and UI/UX design using Figma. Skilled in building simple and user-friendly applications with experience in Java, HTML, and Firebase. Eager to apply technical skills, learn new technologies, and gain practical industry experience in software development.

PROJECTS

Dyslexia Screening System using Fuzzy Logic | Python, Tkinter, Scikit-Fuzzy

ROLES & RESPONSIBILITIES:

- Developed a smart system to analyze typing performance and predict dyslexia risk using fuzzy logic.
- Evaluated user typing speed and accuracy to assess potential learning difficulties.
- Designed and implemented fuzzy logic rules for intelligent risk classification.
- Built an interactive GUI using Tkinter for user-friendly data input and result display.
- Visualized analysis results using graphs for better interpretation and insights.

VisaEase – Travel Booking Web Application | React.js, Node.js, MySQL

ROLES & RESPONSIBILITIES:

- Developed a travel booking website to explore destinations and book travel packages.
- Implemented user authentication including login, signup, and password recovery.
- Built booking system and user dashboard to manage bookings and travel history.
- Integrated REST APIs and MySQL database for user data and booking management
